### **SLEDGEHAMMER! Works Great in All Fuel System Cleaning Machines**

SLEDGEHAMMER! is a powerful blend of poly ether amines, designed to provide effective results when added to the gas tank, or when used with any of the fuel system cleaning machines on the market.

To use SLEDGEHAMMER! in a cleaning machine, you'll need to mix it with gasoline: half SLEDGEHAMMER!, half gas.

So to perform a service on a 6- or 8-cylinder engine, mix a 16-ounce bottle of SLEDGEHAMMER! with 16 ounces of gasoline.

To perform a service on a 4-cylinder engine, mix 8 ounces of SLEDGEHAMMER! with 8 ounces of gasoline.

Then follow the instructions that come with your fuel system cleaning equipment.
