Cool-Rite Quick Kleen Is Safe and Effective

Cool-Rite Quick Kleen Radiator Cleaner is a fast, effective formula for cleaning cooling systems. It's formulated with many of the essential components present in radiator coolants.

In addition, the formula contains rust inhibitors and pH controlling chemicals to prevent formation of acidic and other corrosion promoting byproducts.

Cool-Rite Quick Kleen won't damage the cooling system because it isn't an acid based formula. This same formula has been supplied to the OEMs for many years and is widely used throughout all of North America and Canada.

Quick Kleen Radiator and Cooling System Sealer won't void manufacturer's warranties.
