

#6210 Battery Terminal Clean & Protect Kit

PART NO. 6210 - 12 Kits per case Battery Terminal Clean & Protect Kit

Run-Rite Battery Clean & Protect Kits are designed to clean corrosion from battery cables, electrical connections and battery boxes.

Run-Rite Battery Terminal Protector provides a long lasting protective coating to all electrical cables and connections. Run-Rite Battery Protector makes all electrical surfaces impenetrable to corrosion causing acid fumes which can reduce battery life and can reduce cranking ability. Critical with modern electrical demands.

APPLICATIONS:

All battery and electrical cables and connections

Run-Rite Battery Clean & Protect is designed to deliver the following performance:

- Provides a long lasting barrier to acid fumes
- Helps extend battery life
- Removes corrosion
- Protects against cranking power loss
- Will not dry out or evaporate
- Environmentally safe - resists reversion, moisture, shock & vibration
- Safe to use as directed in automotive electrical applications
